

# Horizon Blue Cross Blue Shield of New Jersey Classic Formulary (Public Sector and Labor)

January 2026

Please talk to your doctor about prescribing medicines from this drug list (formulary). It may help you and your doctor to choose an appropriate medicine and may help reduce your out-of-pocket costs.

This Drug Guide is regularly updated. Please sign Member Online Services at <http://www.HorizonBlue.com>, select “Get Care” and select “Pharmacy Services” to search for medicines according to your pharmacy benefit plan and applicable exclusions.

## Introduction

Horizon Blue Cross Blue Shield of New Jersey (“Horizon BCBSNJ”) is pleased to present the **Classic Formulary (Public Sector and Labor)**. Our goal is to give our members access to safe and effective prescription medicines. Refer to this guide for information, and present it to your doctor if you need a prescription. To note, the guide is updated on a **quarterly** basis. The most recent updates can be accessed [here](#).

The drug list (formulary) is a list of medicines included on the formulary. Coverage of medicines and supplies included on this drug list is subject to your coverage provisions and applicable exclusions, and may differ from that listed. Please refer to the policy and benefit information you received from Horizon BCBSNJ to identify coverage provisions and exclusions. When we refer to “policy and benefit information”, we are referring to one or more of the following: Certificate of Coverage, Contract, or Member Handbook.

## Drug selection

Each medicine chosen for the drug list was analyzed for its safety, efficacy and value by Horizon BCBSNJ's Pharmacy and Therapeutics (P&T) Committee. The P&T Committee is made up of local, independent practicing doctors and pharmacists and meets at least quarterly. Decisions to add or remove medicines from the Classic Drug List are based on safety, efficacy, uniqueness and cost. New medicines are considered Non-Preferred (Tier 3) until reviewed and approved for inclusion on the drug list by the P&T Committee. Horizon BCBSNJ encourages doctors to prescribe Generic (Tier 1) and Preferred (Tier 2) medicines. While coverage is provided for Non-Preferred medicines (Tier 3), members have a higher copay or cost share for them.

To find recent changes or the most current version of this guide, and to search for medicines according to your benefit design and applicable exclusions, log into Member Online Services at <http://www.HorizonBlue.com>. You can also access the most current version of the Guide at <http://www.horizonblue.com/formulary>.

## Member prescription benefit

The drug list is grouped into tiers, and your co-payment or cost share is determined by the tier that the medicine is on: generic (Tier 1), Preferred brand (Tier 2) and Non-Preferred brand (Tier 3).

**Tier 1 – Lowest copayment** – Generics. Tier 1 includes all generic medicines although not all generics are listed.

**Tier 2 – Middle copayment** – Preferred brands. Tier 2 medicines are displayed.

**Tier 3 – Highest copayment** – Non-Preferred brands. Tier 3 medicines are displayed.

The drug list is an open formulary. This means all FDA approved medicines are included. However, certain drug classes are excluded from coverage (not covered) including investigational and cosmetic drugs (such as Propecia<sup>®</sup>, for hair growth), anti-obesity (such as Wegovy<sup>®</sup>, Saxenda<sup>®</sup>, or Zepbound<sup>®</sup>) and erectile dysfunction (such as Viagra<sup>®</sup>) drugs. Coverage, copayment, and additional restrictions and exclusions may vary depending on your pharmacy plan design. Please refer to the policy and benefit information you received from Horizon BCBSNJ.

## Generic drugs

Horizon BCBSNJ encourages the use of generics as a way to provide high-quality medicine at a reduced cost. Generics are as safe and effective as their brand counterparts, and are usually less expensive. Generics are manufactured under the same strict requirements of the Food and Drug Administration's (FDA's) current Good Manufacturing Practice regulations required for brand drugs in manufacturing, strength, purity and quality.

An FDA-approved generic medicine may be substituted for the brand counterpart when it:

- Contains the same active ingredient(s) as the brand.
- Is identical in strength, dosage form and route of administration.
- Is therapeutically equivalent and can be expected to have the same clinical effect and safety profile.

To encourage use of generics, Tier 2 Preferred brand medicines typically move to Tier 3 after an equivalent generic version becomes available in Tier 1.

If you choose to receive a brand name medicine that has a generic equivalent is available, you may be subject to a reduced benefit and a higher out-of-pocket expense for that brand name medicine.

## Affordable Care Act

Some medicines may have limited or \$0 cost-sharing under the Affordable Care Act; examples of categories that may be subject to limited or \$0 cost share include aspirin, breast cancer preventive, fluoride supplements, folic acid supplements, gonorrhea prophylaxis (newborn), HIV pre-exposure prophylaxis, iron supplements, some statin medications, some tobacco cessation products, vitamin D supplements, bowel preparation medications, and some contraceptive drugs and devices. These medicines may also have age restrictions in order to have limited or \$0 cost-sharing.

If you do not find the medicine you are searching for in this Guide, call Pharmacy Member Services at 1-800-370-5088 to find out if the drug is available over-the-counter, or is covered under your medical benefit. You can also log into Member Online Services at <http://www.HorizonBlue.com>.

## Keeping Copays Low for Select Asthma, Diabetes and Anaphylaxis Medicines

As of January 1, 2025,\* there will be a maximum copay applied to all insulin products and asthma inhalers on the formulary and select epinephrine product on the formulary. Your drug coverage may vary depending on the covered drug list (formulary) that applies to your pharmacy benefit, and your copays may or may not be subject to deductibles based on your plan (deductibles only apply to Consumer-Directed Health Plans for epinephrine; all others do not need to meet a deductible).

The requirements of this law, P.L. 2023 c. 105 applies to fully insured Individual, Small and Large Group Plans. Inquire with your self-insured Plan's benefit package to determine if these benefits apply.

\* This benefit is effective beginning on or after January 1, 2025, upon a Plan's issuance or renewal.

## Utilization management (UM)

Some medicines have special requirements where your doctor must provide clinical information to Horizon BCBSNJ before the medicine will be approved and covered by the plan. These special requirements are called utilization management. Medicines with utilization management requirements such as Prior Authorization (PA), Medical Necessity Review and Determination (MND) or that are subject to a Quantity Limit (QL) are noted on the drug list.

### **Prior Authorization/Medical Necessity Review and Determination**

Some medicines require Prior Authorization (PA) before coverage is approved. PA encourages medically necessary, safe, cost-effective medicine use by allowing coverage when certain conditions are met. PA makes sure a prescription is being filled that is suitable for the intended use and covered by the pharmacy benefit. Only drugs that are considered medically necessary are covered. If the Drug List shows that you need a PA for a medicine, your doctor must submit a PA request to Horizon BCBSNJ for review.

After your PA is reviewed, you and your doctor will receive an approval letter that indicates how long it's approved. If the PA request is not approved (denied), the denial reason will be stated along with instructions about the appeal process if you or your doctor wish to appeal. You also have the choice to buy the medicine at your own expense.

Some drugs may be reviewed for medical necessity from time to time, even though they are not subject to our PA requirements.

Detailed PA/MND information can be found [here](#).

## **Quantity Limit**

A Quantity Limit (QL) controls the maximum amount of medicine covered per prescription. It can also identify gender or age restrictions and amount of medicine. QL are placed on certain categories and are based upon FDA-approved drug labeling. These limits help encourage safe and proper use. If the drug list shows that there is a QL, your doctor must submit a PA request to Horizon BCBSNJ for review if he/she wants to exceed the QL for your medicine. Clinical information will be required to be submitted with the PA request to explain why you need to exceed the quantity limit. If the PA request is approved, your medicine will be covered by your plan. If the request is not approved, there is an appeals process available or you may choose to buy the medicine at your own expense.

Detailed QL information can be found [here](#).

## **Specialty**

Specialty medicines require special handling, patient monitoring, and unique education prior to use. These specialty medicines also require your doctor to submit a Prior Authorization (PA) request to Horizon BCBSNJ for review.

Horizon BCBSNJ has contracted with certain specialty pharmacies that specialize in providing these medicines and providing these therapies. Members who want to minimize their cost-sharing are required to obtain the specialty medicines from a participating specialty pharmacy. You cannot receive specialty medicine at a retail pharmacy, through home delivery or from a non-participating specialty pharmacy.

To find out more information about our Specialty Rx Program and to see the list and phone numbers of the participating specialty pharmacies, please refer [here](#).

## How to use this list

The drug list is organized into broad categories (e.g. ANTINEOPLASTIC AGENTS AND RELATED DRUGS). The graphic below shows the information that is provided in each column of the drug list and is only an example. Please use the drug search function to find current information for drugs on the drug list. The below is an example and may not be reflective of the current formulary.

1 Drug Name	2 Drug Tier	3 Prior Authorization	3 Quantity Limits	4 Specialty	5 ACA	6 Limited Distribution
SYLATRON - peginterferon alfa-2b for inj kit 200 mcg	2	•	•	•	•	•
SYLATRON - peginterferon alfa-2b for inj kit 300 mcg	2	•	•	•	•	•
SYLATRON - peginterferon alfa-2b for inj kit 4 x 200 mcg	2	•	•	•	•	•
SYLATRON - peginterferon alfa-2b for inj kit 4 x 300 mcg	2	•	•	•	•	•
SYLATRON - peginterferon alfa-2b for inj kit 600 mcg	2	•	•	•	•	•
TABLOID - thioguanine tab 40 mg	2					
TAFINLAR - dabrafenib mesylate cap 50 mg (base equivalent)	2	•	•	•	•	•
TAFINLAR - dabrafenib mesylate cap 75 mg (base equivalent)	2	•	•	•	•	•
<b>tamoxifen citrate tab 10 mg (base equivalent)</b>	1				•	
<b>tamoxifen citrate tab 20 mg (base equivalent)</b>	1				•	
TARCEVA - erlotinib hcl tab 100 mg (base equivalent)	2	•	•	•	•	•

- 1 The first column of the chart lists the medicine name. Generic medicines are shown in lower-case **boldface** type. Most generics are followed by a reference brand medicine in (parentheses). Some generics have no reference brand. Brand medicines are shown in capital letters followed by the generic name.
- 2 The second column indicates the tier. 1=Generic, 2=Preferred brand, 3=Non-preferred brand, and A=\$0 if ACA requirements are met
- 3 These columns indicate the Utilization Management program(s) that apply to the medicine, such as Prior Authorization and Quantity Limits). If an indicator is present in the column(s), then the UM program(s) applies.
- 4 The column indicates if the medicine is considered a Specialty drug.
- 5 The column indicates if the medicine is required to be covered under the ACA.
- 6 The column indicates if the medicine is considered Limited Distribution.
